

Inspection reports should be reviewed by the responsible maintenance/engineering authority before corrective actions are initiated.

Internal Approval Note Guideline

Document ID: DUMMY-ADM-003

Version: 1.0

Classification: Internal – Demo Data

Purpose

Defines a standard format for preparing internal approval notes.

Required Structure

1. Subject
2. Background
3. Current Situation
4. Problem/Requirement
5. Proposed Action
6. Technical Justification
7. Cost Estimate
8. Risk/Impact
9. Recommendation
10. Approval Required

Writing Guidelines

Approval notes should:

- Be concise and factual.
- Clearly explain why approval is required.
- Separate facts from recommendations.
- Include supporting calculations where applicable.
- Reference relevant internal documents.
- Clearly state the decision requested from the approving authority.

Example Recommendation

"Based on the inspection findings and engineering assessment, approval is recommended for the proposed corrective maintenance activity."
