

Information approved for public distribution.

Internal

Information intended only for organizational personnel.

Confidential

Information that could cause business, operational or security impact if improperly disclosed.

Restricted

Highly sensitive information requiring access only by specifically authorized personnel.

AI Usage Policy

Confidential and Restricted information must not be uploaded to external AI services.

AI processing of sensitive information should use an approved internally hosted system.

Examples

Confidential:

- Vendor negotiations
- Internal financial analysis
- Unreleased project plans
- Internal correspondence

Restricted:

- Security-related information
- Sensitive engineering information
- Critical infrastructure details
- Credentials and authentication information

Logging

AI systems processing sensitive organizational information should maintain appropriate audit logs.

Equipment Maintenance Workflow
